SUBJECT: Long Range IR Transceiver - Field Test

1. The long range IR transceiver developed by TSS/[] is currently in the hands of TSS for preliminary tests and arrangements are being completed to conduct field tests in the [] area during the afternoon and night of 11 April 1955. The equipment will be available at Alcott Hall during the morning of that day for physical inspection by OC-E..

50X1

2. It is contemplated that maximum range tests at [] will permit locating one station on the roof of the Laboratory and the second station will be located on surrounding mountain peaks up to a maximum 10 mile line of sight distance. (Geological maps of the [] quadrangle will be available).

50X1

3. OC-O&T has been invited to have a representative participate in the tests. [] TSS/APD, will be present. It is requested that the undersigned be advised of other individuals that wish to witness the tests to the extent that they would require night-time admission to the Laboratory.
